July 2021

**Plastics Recycling Awards Europe*****ML Sp. z o.o. & Stella Green shortlisted for Plastics Recycling Awards Europe***

ML Sp. z o.o. & Stella Green have been shortlisted for the prestigious Plastics Recycling Awards Europe 2021 in category "Building & Construction Product". Stella Green products are made of plastic waste that would normally end up in landfill. Specially designed permeable paving grids are lightweight, strong and durable. They can withstand compression of up to 420 tonnes per square metre. Useful and easy to install products can be applied with grass or gravel providing excellent solution for car parks, drive ways and any car traffic areas. All our products are made of 100% recycled plastic and fully recyclable.

"We are still striving for perfection, which is why we focus on those areas in which we are able to achieve excellence. Our team of specialists continually improves their knowledge and skills to meet the needs of the most demanding customers. Our own laboratory allows for strict control of production quality and enables to supply recycled plastic granules with repetitive parameters."

Adam Zalewski, Branch Manager

In 2012, the company opened a second division, to some degree independent of the first one and centred around injection moulding of finished products. This division, with its leading brand STELLA GREEN, manufactures soil stabilisation solutions. These products are used in construction and gardening providing excellent water drainage and permeability.

In 2021, alongside the well-established STELLA GREEN brand, the company will be launching an innovative and patented solution for stabilising paddocks and horse riding facilities under the STELLA PADD brand. The company's steady sales growth is attributable to first-rate customer relations, emphasis on company promotion at industry-specific international trade shows and sophisticated advertising in electronic media. Hand in hand with its practical progress, the company continues to promote environmental awareness among its customers, mainly through the re-use of raw materials, adequate care for water management and efficient energy consumption.

The Plastics Recycling Awards Europe 2021 winners will be announced on 5 November, during the second day of the Plastics Recycling Show Europe taking place at the RAI Amsterdam.

Open to organisations and individuals across Europe who are involved in the recycling of plastic materials, the Plastics Recycling Awards Europe are organised jointly by Plastics Recyclers Europe (PRE) and Crain Communications, organisers of the Plastics Recycling Show Europe.
